QlikView Course Content

Introduction
- What Is QlikView?
- About TheOverall Course
- QlikView Basics

Making Queries in QlikView
- Opening the document
- Basic QlikView terminology
- Selections
- Stepping back or forward in the list of
- selections
- Locking and unlocking selections
- Searching values
- Selection bookmarks
- Saving your work
- Checking your work

Handling Sheets & Sheet Objects
- Opening the document
- Sheets
- ogical connections between sheets
- Adding a sheet
- Moving a sheet
- Adding new sheet objects
- Saving, closing and exiting

List Boxes & Statistics Boxes
- Opening the document
- The list box
- The statistics box
- Saving, closing and exiting

Bar Charts & Pie Charts
- Introduction
- Opening the document
- Making selections in a chart
- Changing chart types using a fast type change
- icon
- Creating a bar chart using the Quick Chart
- Wizard
- Creating a bar chart using the full chart wizard
- Removing a chart
- Changing a few properties
- Cloning and detaching your chart
- Turning the bar chart into a pie chart
- Saving, closing and exiting

- Opening the document
- Creating a line chart
- Adding an expression to a bar chart
- Turning the bar chart into a combo chart
- Turning the combo chart into a scatter chart
- Creating a scatter chart from scratch
- Creating a gauge chart
- Working with drill-down functionality
- Copying to Clipboard and printing
- Saving, closing and exiting

Multi Boxes, Table Boxes and Input

- Boxes
- Opening the document
- The multi box
- The table box
- Using an input box
- Saving, closing and exiting

Buttons, Text Objects And Line/Arrow

- Objects
- Opening the document
- The text object
- The line/arrow object
- The button
- Saving, closing and exiting

Sliders, Current Selection Objects and Bookmark Objects

- Opening the document
- The slider/calendar object (in slider mode)
- Creating a Current Selections box
- Creating a bookmark object
- Saving, closing and exiting

Document Properties, User Preferences & Reload

- Opening the document
- Setting Document Properties
- User Preferences
- Reloading data
- Saving, closing and exiting
- Checking your work
- What's next?

CREATING A DOCUMENT

- Introduction

Loading Data into QlikView

- Looking at a delimited text file
- Creating a new QlikView document
- Loading a text file into QlikView

- Saving, closing and exiting

Associating Data from Many Tables
- Associations
- Opening the document
- Loading and associating a second table
- Renaming fields
- Saving, closing and exiting

Concatenating Tables
- Opening the document
- Automatic concatenation
- Forced concatenation
- Saving, closing and exiting

The Table Structure
- Using the Table Viewer
- Labeling tables in the script
- Improving the layout
- Saving, closing and exiting

Layout Themes
- Creating a theme
- Applying a theme
- Saving, closing and exiting

Loading Additional Files
- Opening the document
- Loading a tab separated file without labels
- Loading a file via OLE DB
- Saving, closing and exiting
